To whom it may concern

I have been requesting medical attention since April 2015. I sustained an injury while being detained at Ste. Gen. I have put in numerous medical requests to be treated. I am in constant pain. I can't stand for long periods of time. I'm now getting bed sores from laying down to get relief from the pain. When I have talked to the medical staff I get the run around. I have been told I would get ~~no~~ treatment because my condition is ~~not~~ not life threatening, not serious, Marshal service won't approve, this was at Ste. Gen. When I got to St. Charles the medical staff told me I was being expedited and would get treatment when I got to prison. This was in July 2015 and I had not even ^{been} to trial yet, next I was told by the doctor he would not refer me, then I was told the Marshal service would not approve treatment, then they told me my treatment was elective. I also told my attorney to contact the Marshal service, his reply to me was that the Marshal service was not concerned. I spoke with the Marshals first week of Feb. 2016, their first response was they would get me medical treatment and then I was told I would be released shortly and it would be out of their hands

(over)

because I would not be in custody
it is now the end of feb 2016
and still no treatment. now I'm being
told my release date of Jan, 26, 2016
85% of 1 year and 1 day is discretionary and now
I will serve 100% and my release date is March
26, 2016 and still no medical treatment

I believe my rights are being violated!!!
people get arrested and charged with neglect
for treating animals like this!!!

my lack of treatment is criminal

I am suffering, I am in pain!!!

I want medical treatment or release me
so I can get treatment elsewhere

Sincerely,

David Michael Hagler
